PROFESSIONAL SUMMARY

DevOps and Cloud Support Engineer with 2.5+ years of experience supporting Azure infrastructure, Kubernetes environments, CI/CD workflows, databases, production monitoring, and technical project coordination. Skilled in managing multiple priorities, maintaining documentation, coordinating stakeholders, following structured processes, and resolving operational issues. Reduced recurring production issues by 70% and contributed to a 40% reduction in Azure infrastructure costs through proactive monitoring and resource optimization. Seeking opportunities across DevOps, Cloud Support, Office Administration, Project Coordination, and Operations Support in the UAE.

CORE COMPETENCIES

- Azure Cloud Infrastructure | Kubernetes & AKS | CI/CD Workflows | Linux Administration | Database
- Support Monitoring & Incident Resolution | Technical Documentation | Office Administration | Project
- Coordination Stakeholder Communication | Records & File Management | Report Preparation, Data Accuracy
- Follow-up & Escalation | Process Improvement | MS Office | Time Management | Team Collaboration

PROFESSIONAL EXPERIENCE

DEVOPS ENGINEER

February 2024 - June 2026

ROCKWELL AUTOMATION

Bangalore, India

- Served as primary technical point of contact across three concurrent projects, coordinating planning, stakeholder communication, follow-up, issue escalation, and technical delivery.
- Administered and upgraded Azure Kubernetes Service (AKS) clusters across production and pre-production environments, managing namespaces, pods, deployments, services, and ingress configurations.
- Provisioned and configured Azure virtual machines, compute resources, networking, and storage for application and database environments.
- Managed CPU and memory allocation, access permissions, backup, and restoration across PostgreSQL, MongoDB, and Redis environments.
- Investigated and resolved PostgreSQL transaction errors by analyzing PostgreSQL, PgBouncer, and Patroni relationships, restoring application functionality.
- Built and maintained CI/CD workflows using Git, GitHub, Jenkins, and Azure DevOps; supported GitLab-to-Azure DevOps migration across multiple projects.
- Monitored Kubernetes, virtual machine, and application environments using Prometheus, Grafana, and Azure Monitor, reducing recurring production issues from seven per week to one or two per week—a 70% improvement.
- Optimized Azure resource allocation and virtual machine utilization, contributing to a 40% reduction in infrastructure costs.
- Maintained technical records, issue details, deployment validation information, process documentation, and follow-up updates to support consistent operations.
- Coordinated with development, cloud, application, and infrastructure teams to track actions, communicate status, and support timely resolution of operational issues.

SELECTED PROJECT EXPERIENCE

Industrial Digital Platform

Azure, AKS, Docker, Helm, PostgreSQL, MongoDB, Redis, NGINX Ingress

- Managed production Kubernetes deployment, monitoring, troubleshooting, and validation for UI and core platform services.
- Executed platform upgrades, including a UI component upgrade from v7.07 to v8.02, with deployment validation.
- Configured and troubleshot NGINX Ingress and TLS using Let’s Encrypt for application routing and endpoint availability.
- Coordinated cross-functional teams as technical point of contact and supported infrastructure cost optimization.

Azure Infrastructure & Kubernetes Upgrade

Azure, Linux, AKS, k3s, Docker, Helm, Azure DevOps

- Executed AKS and k3s upgrade paths, cluster health checks, capacity checks, and post-upgrade validation.
- Resolved a cluster-wide NotReady node incident caused by an Azure infrastructure pool failure, restoring application availability.
- Supported database upgrades, CVE remediation, access management, backup and restoration, and GitLab-to-Azure DevOps workflow migration.

EDUCATION

Master of Computer Application	October 2022 - June 2024
<i>TKM College of Engineering</i>	Kerala, India
BSc Mathematics	August 2018 - June 2021
<i>Fatima Mata National College</i>	Kerala, India

TECHNICAL & DIGITAL SKILLS

Cloud: Azure | AKS | Azure VMs | Azure Container Registry | Azure Storage | Azure Monitor | AWS exposure
DevOps: Kubernetes | k3s | Docker | Helm | Git | GitHub | Jenkins | Azure DevOps
Systems & Databases: Linux | Ubuntu | CentOS | Amazon Linux | PostgreSQL | MongoDB | Redis | MySQL | KairosDB | PgBouncer | Patroni
Monitoring, Networking & Security: Prometheus | Grafana | NGINX Ingress | TLS | DNS | service connectivity | port forwarding | CVE remediation | access management
Administration: MS Office | document control | report preparation | data entry | records management | email communication | coordination | follow-up tracking

ADDITIONAL INFORMATION

- Current Location: Dubai, UAE
- UAE Residence Visa: Spouse Visa
- Availability: Immediate
- Nationality: Indian
- Date of Birth: 16/12/2000
